Acrylic ink for most surfaces

Properties:

QUALITY: pigmented acrylic inks, excellent fluidity, velvety or metal. Good lightfastness. The colours can be mixed together.

DRYING: 1 to 2 hours depending on the thickness of the coat

SURFACES: paper, wood, cardboard, canvas, photographic prints, polyester films, acetate, embossing metal ...

DILUTION: water.

OPACITY: opaque colors when applied thickly.

FINISH: ultra matt or metal.

TOOLS: dropper, brush, sponge, stamp, brush, stencil, aqua-brush, airbrush, spray, foam roller, ...

CLEANING THE TOOLS: soapy water.

NUMBER OF COLOURS: 17 ultra matt velvet optical effect colours, 2 metal colours.

PACKAGING: 45 ml bottle with integrated dropper.

SCENT: Lavender

Applications:

Shake well before use.

Bright, even when diluted, decoCraft colours can be mixed with water according to the desired intensity. They can be used especially with deco aqua-brush or deco sprays.

decoCraft ink is ideal for art journaling, art therapy and card making, but also for working on wood and canvas. In particular, it has a stain effect when applied in a thin coat on wood.

Once dry, decoCraft can be worked in overlays. When applied thickly, it has an ultra-matt velvet effect (except metal colours). decoCraft has an extreme matt patina on embossed metal.

When applied to other dry colors, silver and gold colours lend a metallic coating.

decoCraft lends a matt effect to the acetate side to which it is applied, enabling a matt side and a gloss side.

decoCraft allows you to create paper backgrounds even on very dark paper.

The new indispensable component for mixed media, decoCraft can also be worked with Pébéo Drawing Gum.
