

# TURNER ACRYL GOUACHE

**Si vous aimez peindre, seule l'Acryl Gouache de Turner est sur-pigmentée, sans pigment à base de métaux lourds, et résistante à la lumière (à l'exception des couleurs décoratives et fluorescentes).**

**En raison de la faible quantité de liant, le rendu des couleurs reste lumineux à travers les étapes du séchage, et le changement de couleur entre le moment où la peinture est appliquée et le séchage est faible.**

**Turner, du Japon, fabrique des couleurs de très haute qualité, reconnues par les artistes et illustrateurs de cette partie du globe et à travers le monde entier.**

## Caractéristiques

- Incroyable gamme de 219 couleurs
- Couleurs adhérentes à la plupart des surfaces (Carton, Panel, Papier, Bois etc...)
- Les couleurs se diffusent doucement
- Noir riche et blanc super opaque
- Séchage rapide
- Résistance à l'eau
- Couleurs perlées, pastels et Japanesquess

## Idéale pour

- Rendus opaques et mats
- Applications mixed media
- Etudiants aussi bien que professionnels
- Bonne adhésion
- Parfaite pour la création de détails précis

**219**  
COLOURS

## Comment utiliser l'Acryl Gouache de Turner ?

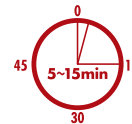

### Avant utilisation

- Diluer la peinture avec de l'eau dans un ratio d'à peu près deux pour un pour un rendu uniforme.
- Pour une application à l'airbrush, ajouter du vernis Gloss en quantité égale ou supérieure au mélange pour un ajustement des tons et augmenter l'adhésion.
- N'importe quel type de pinceau peut être utilisé.
- N'importe quel type de palette peut être utilisée à l'exception de celles en bois et celles en plastique. La peinture pouvant adhérer de façon permanente sur ce type palettes.
- Avant application, dégraisser la surface à peindre avec de l'eau savonneuse etc...

### Pendant utilisation

- L'Acryl Gouache sèche en 5 à 15 minutes et devient résistante à l'eau. Ajouter du retardateur pour ralentir le temps de séchage.
- Envelopper la peinture non sèche dans du cellophane etc...si votre travail est suspendu.
- Pour une technique impasto, utiliser l'Acryl Gouache Turner avec un Gel Medium ou une Modeling Paste.
- Ne pas mélanger avec d'autres types de peintures.
- Si non utilisée, garder les pinceaux dans l'eau afin d'éviter tout séchage.

### Après utilisation

- Nettoyer pinceaux et palettes avant séchage de la peinture. Si secs, tremper les pinceaux et les palettes dans l'eau ou dans l'AG cleaner. Une fois la couche de peinture ramollie, laver les outils dans une eau savonneuse.
